

Stimulus Dollars to Help Your Company Grow

Manpower and San Mateo County are seeking business partners who will bring recently unemployed workers into sustainable employment. Under SMC Works, a subsidized employee placement program created by the County of San Mateo Human Services Agency, Manpower will match the right work-ready employee to your open position(s), on-board the employee, manage them throughout their training period, handle all payroll and only bill you a portion of the employee's rate.

This program will position your company to grow while engaging unemployed workers in sustainable jobs. The result is a winning situation for employer, employee and our community.

What we ask of you:

1. Provide six (6) month assignments with a minimum of 30 hours work per week
2. Commit to sustainable full time regular employment after six (6) months
3. Offer a productive and safe work environment

What we will do for you:

1. Subsidize all statutory costs and service fees
2. Provide associates that have been qualified through Manpower's ISO regulated hiring process
3. Provide benefits to every Manpower employee placed at your company
4. Provide program and case management to ensure successful outcomes
5. Provide continuing education classes for skill enhancement
